New Jersey Space Grant Consortium

**Background**
The New Jersey Space Grant Consortium (NJSGC) is NASA’s educational arm in New Jersey for higher education, charged with progressing the goals of the National Space Grant program.

**Objectives and Programs**
The objectives of NJSGC are to develop programs to further space science, aerospace and STEM (science, technology, engineering, mathematics) education, as well as to foster research and development in New Jersey. NJSGC acts through its affiliates as an umbrella organization, coordinating and developing space science and aerospace-related, high technology, educational and research efforts throughout New Jersey. NJSGC creates and encourages educational and research networks. It acts as a point of contact in New Jersey for space science and STEM education, partnership building and in engaging students and non-students in activities that are in NASA’s educational framework.

In fulfillment of its mission, NJSGC
- Provides undergraduate and graduate level fellowships,
- Assists curriculum and lab development,
- Provides seed funding for cutting edge research initiatives,
- Supports student research clusters at N.J. academic institutions,
- Recruits female and minority students to STEM education and research,
- Supports K-12 science teacher training programs,
- Supports planetariums and informal education programs.

Around 90% of NJSGC fellowship and other award recipients have gone on to graduate study or employment in STEM.

**Affiliate Institutions**
Bloomfield College, Georgian Court Univ., Liberty Science Center, N.J. City Univ., N.J. Inst. of Technology, N.Y. City Research Initiative, Princeton Univ., Astronomy Education Ctr. at Raritan Valley Community Coll., Rowan Univ., Rutgers Univ. (lead institution), Seton Hall Univ., Stevens Inst. of Technology, The College of N.J.

**Contact Information**
**Director:** Haim Baruh, Ph.D. (baruh@jove.rutgers.edu)
**Program Coordinator:** Joseph S. Miles (jmiles@stevens.edu)
**Project Coordinator:** Aiesha F. Long (aieshalo@rci.rutgers.edu)
**Main Office:** Room B-134 School of Engineering Building, Rutgers University, 98 Brett Rd., Piscataway, N.J. 08854. Phone: 848-445-2410, Fax: 732-445-7067, njsgc.rutgers.edu
**Branch Office:** B-107 Burchard Building, Stevens Institute of Technology, Castle Point on Hudson, Hoboken, N.J. 07030. Phone: 201-216-8964.
Fellowship Programs
• Academic Year Fellowships
  One year fellowships for undergraduate students, to conduct research in STEM or space sciences.
• Summer Fellowships
  Summer fellowships for undergraduate students to conduct research at N.J. universities or in industry.
• NASA Centers and NASA Academy
  Undergraduate or graduate level research at a NASA Academy or at a NASA center.
• Graduate Student Fellowships
  Fellowships for graduate students conducting research in STEM and/or aerospace fields.

Research Programs
• Mentored Research Clusters
  Grants to student research clusters in N.J. colleges for summer (or yearlong) research.
• Collaborations with N.J. Research Centers
  Support of the activities of research centers on aerospace and astronomy in New Jersey.
• Community College Research
  Support of STEM students and faculty at community colleges for research activities.
• Travel Support for Researchers
  Travel support for students to attend conferences.
• Research in Science and Education
  Support of minority students to conduct research at New Jersey doctoral institutions.

Higher Education Programs
• Senior and Multi-Year Project Support
  Support of space science, exploration or aerospace related senior projects in N.J. universities.
• Co-Op and Internship Program
  Placement of undergraduate students in co-op programs and internships.
• Space Science Course Development
  Grants for development of new courses at N.J. universities in space science and engineering.
• Student Development
  Summer enrichment programs for entering 1st year college students in STEM fields.
• Bridge Programs for STEM Education
  Programs that combine high school and college students to encourage and promote science study. Supported programs include NYCRI (at NASA GISS), TARGET (at Rutgers), GIST (at GCU), EOF offices, and Liberty Science Center.
• Rock-On and Rock-SAT with NASA
  N.J. college faculty and students attend the Rock-On and Rock-Sat workshops on sounding rockets, launching payloads 75 miles into space.

Pre-College Programs
• STEM Teacher Training
  Support of in-service and pre-service K-12 science teacher training programs statewide. Support of science and engineering majors who wish to become STEM teachers.

Informal Education Programs
• Planetarium Support
  Support of planetariums statewide.
